- CMS: WordPress
- Dizajn : Photoshop , Ilustrator , figma , canva

EDUCATION

Bachelor deggre on University fot Business and Technology -UBT

Current student on Master in University of Business and Technology-UBT

ABOUT ME

I am a passionate developer focused on frontend, backend, and full-stack development. I have completed my Bachelor's degree in Computer Science at UBT and I am currently pursuing my Master's studies in the same field.

Throughout my academic journey and practical projects, I have built functional and secure applications using technologies such as Node.js, Express, React.js, React Native, Next.js, MySQL, and MongoDB. In these projects, I have implemented JWT authentication, role management, well-structured APIs, correct database relationships, as well as online payment methods.

I am highly committed, always eager to learn new technologies, and motivated to solve real-world problems through efficient software solutions. My goal is to contribute to a professional team where I can continue growing as a developer and deliver high-quality results.

EXPERIENCE

- **Full-Stack Internship Tectigon Academy**
- **Hotel System Managmet Project**
- **Ecommerce System Mangmet Project**
- **Fast Food Website Project**
- **Database designe Project**
- **Figma website Project**
- **Job Portal Project**
- **Fast food mobile app Project**
